Informatics I
COURSE REGULATIONS
for the spring semester in the academic year 2016/2017

The course on the Informatics I is held during the second (spring) semester of First Degree studies at the Faculty of Civil Engineering and it consists of laboratories – 30 hours (2 hours per week).

Presence at classes is obligatory. In case of a student’s absence at three or more classes during the semester, the student can be crossed out from the course list.

A final grade is calculated from the sum of the points from two tests (0-12 points per test) and two quizzes (0-4 points per quiz). The grade is entered in the student record book by the person responsible for all groups (dr inż. Sławomir Czarnecki). Date of entering the grades will be posted at the end of the semester, which is 14.06.2017.

In such case when a student gathers an insufficient number of points, it is possible to take one resit test which will consist material from all the classes. The points gathered on the resit test are added to those gathered during the semester. After taking the resit test student can get a maximum grade of 3 as the final grade for the classes. The resit test will be held on last classes.

Grades
points: [16 - 21) grade: 3.0
points: [21 - 25) grade: 3.5
points: [25 - 28) grade: 4.0
points: [28 - 31) grade: 4.5
points: [31 - 32] grade: 5.0
